*Our Nursery is Not Open for Business on Sundays*

LOCATION

Our Nursery is located midway between Minneapolis and St. Paul on Larpenteur Avenue (County Road "A") known as East Hennepin Avenue from Minneapolis, and Eustis Street. Take Como-Harriet car to Eustis Street and walk two blocks north to Nursery. Those coming by automobile from Minneapolis will find East Hennepin Avenue paved to our Nursery. From St. Paul follow Snelling Avenue to Larpenteur Avenue (County Road "A") one half mile north of the Fair Grounds, turning to left one and one-half miles to Nursery, pavement all the way.

PLANTING SEASON

Spring, generally April 1st to May 10th. Fall, October 1st to November 1st. If customers will kindly place their orders as early as possible, it will greatly aid us in making prompt deliveries, when the proper time for deliveries arrives. Twin City orders delivered free, providing they amount to \$2.00 or more; otherwise a charge of 50 cents will be made to cover cost of delivery.

PLANTING

Forty Per Cent Additional For Planting

We greatly prefer to have our customers do their own planting, but where this cannot be done, we will have our experienced men do the planting for 40 per cent extra. Where black soil is needed, customers will kindly see that same is furnished, or an additional charge will be made for securing same.

GUARANTEE TO REPLACE

We guarantee to replace, free of charge, any nursery stock purchased direct from us that dies before October 1st after planting, providing that proper care is exercised in planting, watering and caring for same and dead stock reported to us before October 10th. Prompt payment must be made in full or above guarantee is void.

AGENTS

We do not employ agents in Minneapolis or St. Paul. Customers will find our prices 35 to 50 per cent lower than firms employing agents.

LANDSCAPE SERVICE

Our Landscape Department will be glad to assist you with any planting problems you may have, but it is necessary that you get in touch with us early. Our planting seasons are short, and when the outdoor work opens up we are so rushed that new plans cannot receive the careful attention they should have. The fact that there is snow on the ground will not interfere with our studying your problem and it will enable us to start planting for you just as soon as the ground opens up.

## HARDY SHRUBS

# THERE IS REAL SATISFAC- TION IN LIVING AMONG HOMES LIKE THESE

Can You Say This of Your Home? “My home is surrounded by beautiful shrubs and trees that give me pleasure at the sight of them. While more pretentious residences have been built in the neighborhood, none of them have exceeded mine, because nature has been helping me beautify it, and an ideal home is one where nature finds its fullest and truest expression.

If I wished to sell my property I would ask a much larger price, and sell it much easier than the same building would bring had I not planted these shrubs and trees, and I can only be thankful to the Nurseryman who helped me beautify my home in this way.”

## ROSE HILL NURSERY

MINNEAPOLIS     .:     ST. PAUL

NURSERYMEN     ::     LANDSCAPE ARCHITECTS

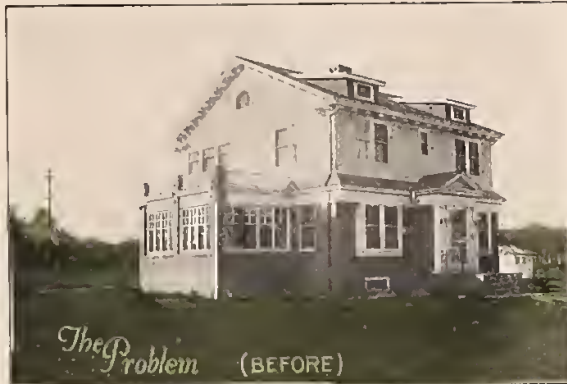

# PLAN BEFORE YOU PLANT

Attractive home grounds are not attained by the indiscriminate planting of trees, shrubs and flowers about the yard, no matter how beautiful each specimen may be, but by properly placing the proper plants according to a pre-arranged plan which takes into consideration the practical and esthetic requirements of each place.

The general opinion still prevails that because the average home grounds are not large in extent, they do not need the careful study put upon their development which the larger town houses and country estates do. Nothing could be further from the truth. In fact, because your property is small and you must get out of it as much pleasure and profit as possible, it behooves you to give to its arrangement and improvement all the knowledge and experience which modern landscape gardening possesses.

We offer our customers an unequalled landscape service under the supervision of men whose good judgment and good taste founded on practical knowledge and experience enables them to assist you in the development of your home grounds so as to obtain immediate results and permanent satisfaction.

The illustrations on this page show the Landscape Development of one of many such problems we have carried out in recent years.

The bareness and unhomelike appearance of THE PROBLEM before planting is very apparent. THE PLAN shows in detail the various areas into which the home grounds must be divided for best use and appearance and also shows the placing of the various types and varieties of plant life used to improve the home property. THE PLEASING PICTURE after the planting has been completed tells its own story. The house seems to be naturally a part of the grounds. Privacy has been gained where before none could be enjoyed, and a source of a great deal of pride and pleasure has been discovered.

OUR LANDSCAPE SERVICE applied to YOUR GROUNDS will produce equally as attractive results. We are also equipped to render an excellent service for improvements about Schools, Factories, Parks, Cemeteries, etc.

Our short planting seasons in the Spring and Fall make it imperative that you get in touch with us early so that we may better plan for the plantings to be made when the proper time arrives. When our outdoor work opens up, we are very busy and find it hard to give plan work the personal attention we can give it during the winter months. Therefore we urge you to call us at once. We can study your problem, take the necessary measurements, and draw the planting plans while the snow is on the ground just as well as after growth has started. By doing this we can then start planting your place promptly, which is a decided advantage.

## DO IT NOW!

# Plantings About the Home are not an Expense

— But a Profitable Investment.

They pay actual dividends in increased property valuation, and in added usefulness and satisfaction as well. Unlike most investments, their value increases with age, and the cost of upkeep is small compared with the many benefits to be derived.

*The plantings about Minneapolis' First Electric Home  
were furnished by us*

We have one hundred acres devoted to the growing of a complete stock of Trees, Shrubs and Perennial Flowers adapted to Northwest conditions. Backed by forty-nine years of practical experience, our customers can be assured of receiving complete satisfaction in any work placed with us.
